

Natural veneer. Acoustic slat panels.

Classic rigid MDF slats with a natural wood face and PET felt backing. For flat interior surfaces.

Natural finishes	Natural Oak / Oak Oil / Natural Walnut / Walnut Oil / Smoked
Panel dimensions	2400 / 2700 / 2800 / 3000 × 600 × 21 mm
Construction	Natural veneer face / 12 mm MDF / 9 mm PET felt
Slat profile	27 mm face / 13 mm gap
Packing and minimum	2 panels per carton / wholesale from 50 m ²

Length	Panel area	Carton coverage
2400 mm	1.44 m ²	2.88 m ² / 2 panels
2700 mm	1.62 m ²	3.24 m ² / 2 panels
2800 mm	1.68 m ²	3.36 m ² / 2 panels
3000 mm	1.80 m ²	3.60 m ² / 2 panels

Order quantities are rounded to whole cartons. Add cutting waste separately. Natural grain and screen colours vary; approve a physical sample.

Acoustic result & test scope

Supplier report CZIN2303000030CM, 27 March 2023, p. 4, lists NRC 0.80. The supplied results page does not identify mounting or air gap. Use the full report to establish whether a proposed assembly matches the test. NRC measures laboratory absorption, not a percentage reduction in room noise.

The Intertek ASTM E84 excerpt covers polyester felt only; it does not establish a fire class for the complete veneered MDF panel. Obtain project-specific installation instructions and applicable full reports before specification.
